Serial No.	
1	Letter No. P. 3410 dated 5th June 1942 from the Supdt, Govt. Printing. Submitting proposals for the Manufacture of rubber Stamps required for the use of the Govt Offices, at the Govt. Press, Bangalore.

The Supdt. Govt. printing States that rubber Stamp making is a simple process, closely related to the work of a printing Office and that it can be Conveniently done at the Govt. Press. He further States that no extra grant is necessary for the Staff or for initial expenditure except for necessary consumable materials such as moulding rubber, Cushion, etc., and other materials which may be estimated to cost about Rs. 500/- per annum at the present high rate of price. He adds that it would be very economical if the manufacture of rubber stamps is centralised at [illegible] Press & Supply made by the Govt. press.

2. He requests Sanction for the manufacture of rubber Stamps and their supply by the Govt. press from the Official year 1942-43, [illegible] the annual recurring expenditure of about Rs. 500/- on account of raw materials being met out of the Sanctioned grant under "purchase of materials & Types" in the Press budget.

3 The proposal of the Supdt, is subm

To

The Secretary to Government,
Development Department,
BANGALORE.

Sir,

SUBJECT:- Proposals regarding the manufacture of Rubber Stamps required for the use of the Government Departments at the - Government Press, Bangalore.

I have the honour to state that as directed in your letter No.G.10195/P & S.55-36-4, dated the 24th June 1937, necessary information regarding the requirements of Rubber Stamps, was obtained from the various departments and details of a scheme for starting the work at the Government Press were forwarded to Government for kind approval, by the Superintendent of Stationery with his letter No.S.1321, dated the 30th October 1937. But Government in their letter No.G.9009/P & S.93-37-2, dated the 12th May 1938, ordered that it was unnecessary for the Government Press to undertake the work, perhaps due to the high initial cost of equipment and also due to the additional recurring cost of additional establishment reported necessary.

I may, in this connection, bring to the kind notice of Government that Rubber Stamp making is a simple process which is closely related to the work of a Printing Office and which can therefore be conveniently done at the Government Press. It is now found that necessary equipment can be made available by the repair machine shop of the Govern-

P.T.O.

Government Press and the Staff of the repair shop can look after the making of the Rubber Stamps. One of the clerks in the Forms Branch can easily attend to the routine -- correspondence work connected with the supply of stamps to the Departments. It may thus be seen that neither extra Staff nor extra Funds for initial expenditure such as - purchasing the plant, etc., would be required for the purpos except for necessary consumable materials, such as moulding rubber, cushion, moulding composition, plaster of paris, etc the quantities entirely depending on the number of stamps that will be requisitioned by the various departments of Government.

By consolidating the requirements of all the departments, it is roughly estimated that the quantity of moulding rubber required per annum is about 25 lbs. The other - materials are proportionately gauged and valued. The approximate cost of these materials is estimated to be Rs.500/- per annum at the present high cost of materials.

At present, Rubber Stamps are purchased by the departments locally and their cost has abnormally risen-about cent per cent - on account of the International Situation. It would be very economical if they are manufactured at the Government Press and serviced to the various departments of Government. Rubber Stamps will be prepared and supplied to the departments after obtaining their indents for the supply and getting back the old stamps. The handles, the plates and cushions of the old stamps, if in good order, will be used for preparing new ones, thus resulting in the saving of useful material, which at present is being wasted by the departments. In addition, the fitness or otherwise of the old stamps returned by the departments and the necessity for preparing new ones will also be scrutinised in this office.

P.T.O.

On the whole, the preparation and supply of Rubber Stamps by the Government Press to all departments of Government will result in appreciable savings to - Government. It is becuase of the economies that will accrue by centralising the manufacture and supply of Rubber Stamps that almost all Government Presses in the British Indian Provinces and the States, possess the necessary equipment and manufacture Rubber Stamps on a large scale.

I therefore request Government that, in the interests of economy and the special facilities that the Government Press now affords for the manufacture of Rubber Stamps, early sanction may be accorded for the manufacture of Rubber Stamps and their supply by the Government Press, from the Official year 1942-43 and for meeting the annual recurring expenditure of about Rs.500/- on account of raw materials out of the sanctioned grants under the head " Purchase of - Materials and Types".

I have the honour to be,

Sir,

Your most obedient servant,

Ostwoshan Chetty 4/6/42

SUPERINTENDENT.
